

DO NOTHING & EARN A LOT.

*'Bhagavan –Ishwar –Prabhu –Khuda -God' we call him by many names, we all have one master, he sends animals, birds and humans to protect this 'Beautiful Earth' and to give them power to work, 'God' gives 'Free Food and Water' to everyone through his 'Natural Cycle', there is proof of this that animals and birds get it for free, **then why can't humans get it? We are getting it brother,** but due to the policies of some **traitors and deceitful people**, others are not getting it for free and when 'Food and Water' is not available for life, then people are forced to do wrong things to get it.*

To get 'Free Food and Water' from 'Natural Cycle', in 1960, Shri Save invented 'Organic Farming System - OFS' and even today, only with water irrigation, from the 'Natural Cycle', his family is getting abundant production and for this scientific discovery, Shri Save received many 'National and International Awards'. Even today, by adopting Shri Save OFS, anyone can become a 'Millionaire' and get everything for free from the 'Natural Cycle'.

*"Human Service is known as a Service to God", that is why we 'Save & Sanghavi' are giving all the OFS information, so that the whole world can get rid from 'Hunger, Water and Global Warming'. See 'Natural Tablets' section and from any disease get relief in 15 days. We are giving our all the information at 'Free of Cost', but to loot, fraud people have suppressed all our free information, due to that see our society's condition. Now to get rid of all the problems, we have to work jointly and to help everyone and as a '**Noble Work**', forward this information copy to get support.*

In the name 'Modern Science' for looting, a system has been developed, 'First by 'Modern Farming System - MFS', with the help of chemical fertilizers they have shown more productions and farmer got trapped. After eating such toxic foods, one gets incurable diseases, that time, in the name of 'Modern Treatment & Medicine', they provide fast relief and due to 'Medicine Side-Effects', people are dying in less than 50 years!! Due to such MFS plans, the earth has become barren, day by day the 'Hunger and Water' problems are increasing, in wrong ways of earning, MFS has spoiled the 'Environment', increased 'Global Warming' and people are living like a beggar on 'Mercy'. Before all the problems get increased, 'Wake Up Brother, Wake Up' and by our Shri Save simple OFS come out from all the problems.

As the protector of this 'Beautiful Earth' human is sent as a 'Vegetarian', empty handed and after seeing honesty working in the lief, 'God' decides the duration of life. When 'God' sends empty handed, it is his duty to provide 'Food and Water', so all the earth protectors get energy to work.

*Yes sir, our human demand is right, so to provide free healthy food and water, 'God' runs his 'Natural Cycle' and for takes the help of 'Mother Earth, Mother Cow, Environment and Green World'. By eating such pure food, everyone gets the energy for working, one can rebuild the new generation, earn good money for purchasing others life needs for family and while working happily, **when the 'God' calls back, the person returns empty handed.***

*Every morning to get need physical new strength, in morning **God** wakes us up with an empty stomach and at night after the stomach is full, **God** gives us deep sleep to digest the food, so the next morning one gets new energy. **Do you get this FREE facility?** If no!! 1*

Then this is the reason for the **'Punishment of Bad Karma'** of interfering in the **'Natural Cycle'**. If you want to live a **'Healthy life with Happiness and Want to Become a Millionaire'**, then stop interfering in the **'Natural Cycle'**. Sir, in 1960 our Shri Save discovered the **Organic Farming System – OFS**, by which without any input cost and only with water irrigation, we are getting everything free.

In life, why all do not get the benefits of **'God Free Services?'** Reason is, today no one is interested in knowing, what is written in the scriptures books? What are the benefits of living in a joint family? How did ancestors live long and happily for more than 100 years? If people like us ask about progress then all say, **'Sir, today is 'Modern Time - Era' and by the 'Morden System' only we are making progress, so the whole world has adopted it'**.

About **'Modern System'** people are living in illusion, the fact is, in a few months a system gets updated, so one has to learn new and forcibly have to purchase a new system, like Mobile, first 2G, then 3G, 4G and now 5G!! **'Morden means, throw old and take the new'**. Same system applies in **'Modern Education'**, so parents are running after their children and spending their **'Hard Earned Money'** on **'Modern Education'**, using children's valuable time to get **'Master Degrees'**. To get degrees parents only make children as **'Bookworms!!'** **After 'Modern Education Degrees', doctors cannot cure their own disease and farmer cannot do profitable farming!! Such a degree is useful to do only 'Jobs' (slavery).** Now **'Modern Science'** has developed **'Roberts'**, due to which **'Small Industries'** have closed and all over the world, millions of people have lost their jobs. Even **'Well-Educated Degree Holder'** cannot take care of their parents so they go into **'Old Age Homes'**, they are unable to repay bank loans so they are dependent on **'Women's Wages'**. The scriptures say, a woman has **'Nine Goddesses'** and her duty is to take care of the family, but in today's modern era, she is also helpless, forced to go to work and do many kinds of wrong work to fulfil the needs of the family. **Fact is, in life you do any work, but to survive all need 'Healthy Food', so come out from the 'Morden illusion', think about farming, become 'Millionaire' without any 'Hard Work' by our 'Below Simplest Shri Save System'.**

See how one gets trapped by illusion of **'Modern Farming System- MFS'**. With the help of **'Modern Science'**, we can go to other planets, but only **MFS** science does not have the power to grow new 1,000 grains from an old 1 seed. **Yes, for the first time, farmers get four times good production, but that is only by sucking the blood of mother earth and after 3 crops, no matter how much you spend on fertilizers, you do not get the same yield. To get production, farmer have to use more and more chemical fertilizer, due to this MFS many acres of land have become barren, expenses are more than income, the farmer is incurring huge losses, that is why the farmer is committing suicide.**

'Wow brother Wow', by adopting 'Modern Science and System' see what a great progress we have made, if there was progress, then people would not have died due to hunger and lack of water scarcity. 'Environment' has disturbed, 'Global Warming' is increasing and till date 'The Modern System has No Solution for this Problem!!'

Sir, we do not oppose MFS, but with OFS we can make progress. The proof of that is our, after combining the MFS with our 'Shri Save OFS' and only with very little water my 'Sanghavi Farm' barren land converted into fertile land. Now any land which has been turned into barren by MFS, by combining with OFS, it can be fertile, which will remove the 'Hunger & Water' problem and it also has a solution to 'Global Warming'.

To live and for digesting food, 'God' has given only one stomach, but our experience says, 'Human has two!!' One is 'Natural Stomach' which gets filled after eating food, but the second stomach has developed by the human, which never gets filled, because no matter how much you earn, by greed, deceit and fraud, it never get full.

Humans know the 'Divine Truth' that, in the last journey 'Earned money one cannot take with them, then also run after earning, one lose all the body energy, suffers from incurable diseases and dies before time'. **Sir, tell me what is the use of such money which cannot give healthy food for disease free life?** And in the end of life, cry and regret about not enjoying life. **Now like us combine OFS spiritual knowledge with MSF and get everything 'Free', first know four ways to get 'Healthy Life, Wealth, Happiness and Prosperity'.**

Before birth no one gets any choice to select a city - place, father-mother, brother-sister, one gets all this as per the last births of 'Karma' **so accept as the will of God and Holy Prasad.** Animals live alone, so they get hunted, where we humans live in a joint family so in unity we all are safe, family person does not even know in life, when happiness or sorrow comes and go, all the person gets the joy of life in joint family, a person is accepted with all his flaws, everyone takes care of each other in good and bad times, so a person should live in a joint family with the honesty and see, **there be a rainfall of money and to get that, four ways is written in Hindu scriptures, and by following them anyone can become a 'Millionaires', without any input cost, much labour and with the help of 'Nature Cycle'.**

In 'Hindu Scriptures' to enjoy human birth, our ancestors have written some concert information. They have found that, after birth, 'Human' live in four steps, 'Karma (Deeds) - Dharma (Religion) - Arth (Wealth - Money) and by attaining this all get Moksh – (Salvation)'. To live a happy life, money is necessary so in 'Hindu – Jain Book', to enjoy human birth, our ancestors have shown four steps to earn good money. The first and easiest way to get is 'Organic Farming', second is 'Industry and Trading', third is lower status to get money is 'Job (slavery) – Share Market - Brokerage', in this company people do very hard work and if they earn, then only gives some amount to the lazy investors and the fourth is 'Begging' to live. Brother, even today we can regain all the joy, happiness and wealth of life which is hidden in the word 'Bhagwan' and this word is given by the 'First Lord of Hindus – Jains Shri Rushabhdev'. According to the information given in the scriptures this word 'Bhagwan' helps OFS and it maintains the 'Natural Cycle' and 'Environment', but for looting MFS has burnt the scriptures of all the solid information of word 'Bhagwan'.

In 1960, 'Shri Save discovered the meaning of 'Bhagwan' and by OFS received many 'National and International Awards'. But after 'India Independence' the useful 3

information is suppressed. The strong proof of this is, even after ruling for 200 years, the British could not loot India, who was a 'The World's Best in Farming' because at that time there was unity, but due to the looting policies of some deceitful people, in just 60 years, India, Pakistan and many countries are ruined by 'MFS' and are still being ruined.

Hindu scriptures say, farming is the best way to live and be self-dependent so we 'Save & Sanghavi' chose farming for our life. By farming, we have understood the words 'Bhagavan' and 'Nature Cycles' and also we came to know why our ancestors said farming is the right way to live and become a 'Millionaire'. Because with the help of nature, from 1 seed we get new 1000 grains, which means with Rs.1/- investment, only by water irrigation, Rs.1,000/- can be earned in 90 days. See how this is possible?

Since 1960, by following 'Natural Cycle Norms' we have been doing OFS and earning good profits. When we are getting profits, why are farmers not getting it from MFS? The truth is that nature is giving for free but due to greedy nature, farmers want more, so they adopted MFS and once farmers got 4 times good productions and became 'Rich' and farmers thought that MFS is the right system of farming. **Now the whole world knows how land becomes barren, its poisonous production has developed incurable diseases and no one is giving OFS knowledge so farmers are forced to do MFS.**

Why only OFS? Let's understand this from a religious point of view. **'If we cannot give life, we have no right to take anyone's life'**. Hindu - Jain scriptures says that, **committing sin (krut), ask to commit sin (karit) and supporting sin (anumodan), these are part of sin**, after doing such sin, how many rosaries one chant, give donations, give free food to the poor, try to get rid of such committed sins and try to please **God**, but person have to suffer the punishment for such **'Bad Karma'**. **The truth is, 'God has made man 100% vegetarian' and 'God' is giving everything free for living**, still people kill innocent lives and eat, this is also a sin of interfering in the **'Natural Cycle'** and have to suffer the punishment.

By supporting **MFS**, see how people become partners in sin and suffer the punishment of **bad deeds**? To get more yield through **MFS**, farmers have used fertilizers and pesticides, killed lakhs of insects also farmers' **'Best Friend Earthworm'**, so the fertility of the soil has got destroyed, the **'Environment'** has spoiled, **'Natural Cycle'** has been interfered and when we buy such **MFS** the product, knowingly or unknowingly, we are supporting **MFS** and according to the scriptures, we become partners in all that sin and we are suffering for such **'Deeds'**. **The proof of this MFS is, see the current condition of India and as a punishment, today 'The World Best Farming Country' have to import food and live on someone 'Mercy'**.

Another way of sin. Instead of making the people self-reliant, according to the plan of teaching **MFS** in college, the people who eat such **MFS** grown food, will get incurable disease and without shedding a single drop of blood and killing people, automatically with the suffocation all goes to the graveyard. (Due to **Nehru** in Punjab, in Africa and many countries are solid proof of this, due to **MFS** food every household in the world has Cancer.)

Many times we think, are these MFS plan developer's fools? Because they 4

know the truth that 'One day they will also die and will go back empty handed, then why are these foolish people doing 'Bad Karma' robbing, cheating and killing innocent people?' In short, you reap what you sow, so before leaving this beautiful world, do something good 'Deeds' so that the world remembers you. The truth is, we 'Save & Sanghavi' want to make all the world people 'Self-Reliant by our Shri Save OFS', which we have discovered to get 'Healthy Life, Happiness and Prosperity' so we are giving and showing free to 'Hindu - Muslim - Christian' so all can enjoy their human birth.

Shri Save used to say, 'Brother, dogs also live but Sir, we are human and smart who live for family and society, so forget the past and think about the future. If we take the help of spiritual knowledge and the '**Natural Cycle**' and combine it with '**Modern Science**' then we will be able to make progress and if we stick only to **MFS** then this 'Beautiful earth will be destroyed', which is happening. In 1960, I suffered a great loss in MFS and I came to know that in future there will be very bad days for getting 'Food and Water', so to protect all, at the feet of society, I have put all my OFS which I have discovered, so only with water all can do OFS and able to protect this 'Beautiful Green World' and live happily.

'By Shri Save Organic Farming & By Natural Cycle, Get all Free'

First understand Shri Save OFS, come and see our actual work at the farm, how we are getting everything for free from 'Natural Cycle'. Because even in dreams, the farmer community cannot think that farming is possible only by water irrigation, there is no need of ploughing, no fertilizer – pesticides, no need to uproot grass. In 1960, the late Shri Save observed the 'Natural Cycle' and discovered new OFS, he saw that free of cost nature itself does all the work of farming, so why should I spend, like an animal why should I work in the hot sun? From that day, he started doing OFS in his 'Kalpvriksh Farm' and by research, gradually he stopped interfering in the 'Natural Cycle'. In 'Field Crops' which get ready in 4 to 6 months, he used to do only primary tillage and sow seeds and do little irrigation so that the plant gets only moisture and he left the rest of the work to the 'Natural Cycle'. With this system, whatever healthy production nature uses to give as per its will, with the satisfaction and as 'God Holy Prasad' Shri Save uses to take them. In 'Horticultural Crops', he did only primary tillage, dug pits to planted saplings and used to do only little irrigation, by this he started getting the highest production in the world. Further he saw that 'Natural Cycle' only took care of own creation so after a few years he stopped all the tillage and completely stopped irrigation in 'Horticultural', this way from OFS he turned to 'Natural Farming System -NFS'. Starting from 1960 till today i.e. 2025, with this system, Shri Save's family is living a happy life by taking healthy production and good profits. When Shri Save was doing MFS, what a miracle happened that Shri Save turned to OFS and later to NFS.

In 1957 Shri Save did MFS, first 3 years he got good yield, so he became '**Agent of Fertilizers**' and started earning a lot, this way **Shri Save got trapped in MFS**. After 3 years his income and production started decreasing, income was **Rs.100/-** but expenses went 5

up to **Rs. 80/-** and only sometimes he was getting a profit of **Rs. 20/-**. Once he suffered heavy losses, **then he understood white's looting plan of MFS**. He saw that there was no problem in the land, but the reason for his losses was **MFS** in which the cost of input and labour cost had increased, yield decreased and soil was losing its fertility.

In 1960, Shri Save understood the 'Natural Cycle of Live and Let Live System'. After seeing the growth of forests, he realized that the roots of trees are very well spread, there is no tilling, fertilizer, water, crop protection and weeding, only with the help of nature all these plants are growing. In fact 'Green World is Self-Reliance', they do not need any support. This way, Shri Save had the 'Darshan -Vision' of the real 'Bhagavan' and understood his mistake of adopting MFS. Shri Save understood that, 'Nature Cycle' only takes care of its own creation, as long man does not interfere in its work, then 'Divine Power' is providing 'Food and Water' free of cost to live a happy life.

In 1960, 'For the First Time in the World' with the help of 'Natural Cycle', Shri Save started 'Organic Farming' and adopted 'Live and Let Live System'. In new experiments, his farm income was only **Rs.50/-**, but the profit was more!! **Shri Save** did not interfere in the 'Natural Cycle except Irrigation', so his expenditure was only **Rs.10/-**, by this he got a profit of **Rs.40/-** and got toxin free healthy produce. **By looking at this result, even an illiterate person can understand that, by using MFS chemicals, does he want only poisonous and only show-off more produce which gives disease or does he want Organic Farming pure and healthy life-giving produce, which also gives good profits?** Yes, Shri Save production and income was reduced by 50% but surprisingly **'Profit has increased 300%!!'** Fact is **MFS** sucks the blood of **Mother Earth** and gives high poisonous produce, makes the 'Land Barren' and gives no profit, when the illusion of this broke and the truth was revealed; to get more production than the **MFS**, **Shri Save** started many new experiments and started new research of low cost of **OFS**.

To know the 'Natural Cycle', once taste the farm soil, do you think you will get any taste? Then also 'Natural Cycle' gives us sweet and sour fruits, grains, vegetables and bitter leaves!! In giving this productions, natural takes the help of 'Green World'. How is this happening? **Sir, life exists only on this earth and that is why we have come to protect and serve 'Mother Earth', from 'God' take the Free Holy Prasad' and enjoy life, do not go into deep to know how 'Natural Cycle' give us food and water?' That is why we are saying again and again, Brother please do not interfere in the 'Natural Cycle'.**

Many scientists have a habit of interfering in the 'Natural Cycle'. They try to find where nature has installed a water pump? By which fresh sweet water goes up to 40 feet and fills the coconuts? Till date, farmers have taken lakhs of tons of produce from the fields but till date, pits have not been formed in the field land!! How does this land become fertile again and again? So, after a lot of research, out of **12 main alkalis - salt** scientists found **3 NPK chemicals** and only by that showing **4 times good production of illusion they have trapped the farmer** and huge looting got started. **Even today, to get more production and** 6

profit, 'India, the World Best Farming Country' and many countries are still trapped and all are in the illusion that they will get more yield and profit, this is the reason in such research, day by day food and water scarcity is increasing.

From years of patience, observation, many losses, experiment, applying many new techniques and by 'Discovery of Irrigation System, Shri Save have Achieved Commendable Success'. This all research was first time in the World so Shri Save have received many 'National and International Awards'. Now with Shri Save's Organic Farming System, we are getting 'Nutritious Bumper Production' which is useful in disease relief, we get 'Huge Profits', 'Clean Environment' and it has a 'Solution to Global Warming' and very important is all this success we get only with water moisture, less labour, without any MFS. For proper education, Shri Save used to say, 'My School, College and University is My Farm', where by doing actual 'Organic Farming' I learnt that little irrigation is enough to help the vegetation flourish and God blesses us with abundant yield for our 'Noble Work'.

Late Shri Save was a small farmer but without any greed and expectation he shared his entire 'OFS Discovery and Secrets of Scientific Principles of Natural Cycles'. First Shri Save started with OFS and after getting success, he turned to NFS i.e. 'DO NOTHING & EARN MORE'. Shri Save learnt that there are only five basic principles of farming and free of cost 'God' helps us by his 'Natural Cycles'. For easy understanding of the five basic principles of OFS and by MFS, where farmers are cheated, for the cost savings, some comparison and important information is given.

1. **Tilling:** After primary tilling, other tillage is done by earthworms and other microbes. Throughout the life cycle '**Earthworms**' make millions of holes just like a tunnel. Every time an earthworm has to come up from soil for its '**Naturally Excreting System**'. While coming up and going back into the soil every time an earthworm makes 2 new holes. **Shri Save** observed that in **OFS** in one acre land one can find 4 to 6 lakh earthworm, by its natural excreting system, on an average 10 time in a day earthworm's come up and go back in the soil and makes 20 holes in the farm soil, **thus 4 lakh X 20 holes in a day = 80 lakh holes are made in a day**, so by this process land tilling work done by earthworms so I did not required to till land, also **its excrete – waste and urine contains many elements like manganese, nitrogen etc. which act as organic manure which is a food for the plants growth.** Through those holes, the roots get fresh air and during the rainy season, water is easily absorbed into the soil, which helps to raise the groundwater level. This is a reason, '**Earthworms are called the Farmer's Best Friend**', for their beautiful system of providing free tillage, manure and help in increasing water level. **Earthworms work better than tractors because tractors eat oil, pollute the environment and farmland soft soil gets compressed, due to tractors' heavy weight, which stops growth and spreading of roots.**

Daily we consume salt, if it falls on earthworms, our free working friend dies on the 7

spot, **now think in MFS, when farmers use chemical fertilizers, what must be happening to the earthworm? This is the reason farmers have to till land, need to buy fertilizer for the plants and face losses for such sin.** Now you have come to know the benefits of earthworms so never buy them, because farm soil has **chemicals** so they die and the fact is that, when soil gets suitable to it, **nature only sends earthworms free of cost.**

See strong proof, after first and primary tillage, till date Shri Save has not tilled the land and like forest, his trees are giving productions. Instead of acknowledging the kindness of these earthworms, for our greed we use chemical fertilizers by MFS and strangle them.

2. Manure: We should know what manure is? **Shri Save has discovered a simple scientific system, so let's understand about the wright manure.** Do one experiment, dig a pit and put plastic, glass, rubber, a log of iron, also dead body and close with the soil. After 6 months take them out from the pit, in the soil only iron logs and dead bodies start decomposing, where others are developed with help of modern science they remain in the same condition. **In short, anything which has developed by 'Natural Cycles' of five elements gets decomposed and dissolves in the soil that is known as 'Manure for the farming'.** For a healthy body we need 12 alkalis – salts which we get by OFS and by MFS we get only 3 NPK and they are toxic, the rest 9 salt in some quantity 'Green World' get from water and environment. **If chemical fertilizers could have given yield, then why is cow dung used in MFS? By now the whole world knows about MFS.**

In OFS to get free manure, without ploughing, around plant trunk and tree roots we put dead leaves, cow dung and green household vegetable waste. **In our Shri Save OFS we call this a 'Buffet System'.** The farmer's best earthworm friends convert that waste into 'Excellent Organic Manure'. **When earthworms are giving manure for free then brother, why should we show our stupidity by buying manure sold as organic manure?**

The white people have a plan and system to sell their MFS goods, **'First they try to convince the buyer for their products and if they do not purchase, then they confuse and misguide'.** We have seen that companies are importing, some they developed and to sell them, they appoint dealers. Both want good profits, so in a seminar and as a show business, they give **'Organic Farming Awards, to their own people'** and by seeing this, farmers get trapped. **The fact is that these 'Award Winners and Certification Agencies do not know the ABCD of OFS!!'** This award winner says to the farmers, if you want to sell your **'Organic Produce at High Prices'**, then you need **'Organic Food Certificate'** and for that you have to do **'Organic farming'**. So in the name of OFS, this award winner asks farmers to build huge tanks, so to get earthworm manure, farmers build huge tanks.

Farmers are paying costs for building tanks, labour costs of filling it with garbage and removing vermicomposting from tanks. In this type of OFS, farmers do not earn, because in removing vermicomposting from tanks, useful natural gas evaporates, labour has to be paid for carrying and feeding to plant, still farmers are not able to sell its organic produce!! Because in the name of selling such organic products, some of the old MFS toxic elements remain,

so farmers cannot sell it. In short, farmers have to bear the loss of the entire cost of '**Organic Food Certificate**'. When farmers do not get profit in **OFS**, they turn back to **MFS**. This is a plan to sell the goods of MFS so no farmer can get out of the their trap.

In Shri Save Buffet OFS, earthworms put food directly in the mouth of the roots and no system in the world can do this, farmers get abundant and healthy produce without any investment. By doing a new experiment in just 4 months, we have come out of the clutches of the **MFS** and have also obtained the richest organic produce from Barren Land of 'Sanghavi Farm'.

3. Water: Shri. Save studied that on this 'Beautiful Earth' we have 100% water out of them, 95% water is salty in the sea, 3% water is stored as ice, 2% water is stored underground and we are surviving on only 1% water, so we should use it very carefully. Shri Save found, 'Irrigation near the roots is suffocating and makes tree-plant very weak, its flowers bloom but fall before giving fruits for which we call an 'Abortion'. Then **Shri Save discovered the 'Platform and Trench Irrigation System'** and '**Croton Plant**'. (see photos) After getting information from '**Croton Plant**', we do irrigation at distance of 12 to 15 feet, which has saved our **80%** water, without any cost our ground water level has increased, **by this system our trees never lose fruit and our production has increased, because in OFS trees and plants do not need water but they need only moisture. After seeing the 'Forest trees survive on their own and no one does irrigation', Shri. Save adopted 'Natural Farming System - NFS'.**

In 1960, Shri Save well water was **30 feet**, while nearby farmers who were doing **MFS**, their water level went down to **150 feet** and many had dried up and today, **they don't get enough water to survive.** Now see how much water **Shri. Save is saving with his OFS.**

When **Shri. Save** was doing **MFS**, per day on each coconut- chikoo- mango tree he was using **140 to 150 litres**. Then at a huge cost he bought '**Drip Irrigation**' and water reduced to **70 to 80 litres**, but the maintenance cost of this system increased a lot and it required continuous electricity to run and that is never possible to get in farming. **Then Shri Save invented 'Platform and Trench Irrigation System'** and '**Croton Plant**' and water requirements were reduced to **10 to 15 litres**, so even today our water is at **40 feet**.

Finally Shri Save invented the system of '**Surya Mandal - Planetary System**' and proved that farming is possible even in the desert by drawing water from the atmosphere and showed a coconut tree is able to bear fruits with just 1 litre of water.

4. Crop Protection: When a boy and a girl become adults, they get attracted to each other and fall in love. Similarly, before fruits appear, when 'Nectar-Honey' is formed on trees and plants, many kinds of insects come to suck the sweet juice and this 'Natural Action' starts the '**Pollination Process**' and no power in the world can stop this '**Natural System**'. Without understanding the '**Natural Cycle and Law of Attraction**', what do we humans do? When children fall in love, parents punish children and farmers are 9

spraying pesticides and interfering in the **'Holy Functioning of the Natural Cycle of Generating of New Products'**. Farmers kill useful bacteria, birds, animals, insects etc. As I said, directly or indirectly we do sin. **All 'Holy Scriptures' say 'We are protectors of this earth, our duty is to protect earth, we are not born to 'Plunder Natural Treasures', so adopt 'Live and Let Others Live', when we cannot give life, we have no right to kill anyone. The fact is, this department belongs to Brahma, Vishnu and Shankar (Three God - G generator - O operator - D destroyer), so don't interfere in their department.**

'Natural cycle has its own scientific system', which farmer do not understand and that is way crop get eaten by pests and due to that loss farmers commit suicide'. Now see the solid proof of MFS's loot. We asked the farmer, brother, for crop protection you bought the most expensive insecticide and to control it you sprayed it on the trees and plants, are those insects in control and are crops safe? **Disappointed farmer says, 'Our hard earned money is spent on buying insecticides and due to spraying we get many diseases, the farm produce also becomes poisonous and we have seen for years that after spraying the medicine lakhs of insects die, but till date neither we nor the experts of MSF have been able to understand in just a few days, how these insects get increased? Many times our entire crop gets destroyed due to the insects!!**

'For crop protection and to keep pests away from crops, we use Organic Medicine'. To develop 'Natural Medicine', we put basil, neem and many other poisonous plants leaves in 'Cow Urine' and let it rot for 10 days, then we filter it by placing a cloth and the solution obtained is put in a spray pump, mix 1 part solution and 9 parts plain water, and spray it on crops to control pests and wait for 15 days. This solution does not kill the germs, insects, but pests get reduced and our crops get controlled by this 'Natural Scientific Way'.

Further, Shri Save found and discovered system that, if necessary then only spray 'Organic Medicine Solution', because 'Natural Cycle has its own Crop Protection System', for which nature has created red ants, spiders, frogs and many other creatures for this protection work. In a day, these protectors' creatures eat more insects than their weight, similarly owls and many carnivorous animals and birds do their duty by hunting. When all the work is done for free, then why show our stupidity by buying MSF insecticide? **By spraying it, along with the useful crop protector, the crop-eating insects also die and later only the crop-eating insects grow (!??) Then no matter how much effort is made, the pests do not come under control and neither the crops in the fields are protected. In OFS, how pests are controlled? This discovery was also found by Shri Save, which is written in my book. But again we are saying, 'Brother don't go into depth, eat the free food given by 'God' and please don't interfere in the 'Nature Cycle'.**

To save farmers money, we advise that in the name of **OFS** many people sell readymade solutions for pest control, do not buy them, because when all these materials are available free of cost from nature, then why do you pretend to be foolish by buying them, because the shopkeeper selling such solutions also takes it free of cost from nature and **10**

how to prepare a natural solution for crop protection? That simple **OFS** is written above. **Till now, farmers have to bear huge losses in MFS and you commit a sin by doing the wrong thing of killing innocent insects, so it is wise to leave such wrong MFS. There is a scientific way by which again farmers can invite crop protectors to their fields.**

5. Weeds and Grass: In an OFS, grass is a great boon and blessing of nature. Naturally grown grasses have the unique ability to cool the atmosphere, store nitrogen and vital nutrients in the soil, which benefit other plants, protect 'Mother Earth and Serves as Clothes' from scorching summers, helps in the growth of the main crop and prevents evaporation of water. When the length of the grass is more than the crop, we never uproot it from the ground, but we cut it leaving about 1-2 inches from the ground and mulch there only or use it as fodder for animals. So from Cow we get milk, we get bulls for transportation, from both we get organic manure, urine for crop protection. Because all this is available for free, our **'Hindu Shastra'** say's **'Cow is our Mother and Animals are our Wealth'**. **Now look at our foolishness, we call ourselves 'Hindu' and we only hand over our own 'Mother Cow' and other animals to the butcher!! Why has this grass uprooting system been developed?**

In **'MFS'**, farmers consider **'Grass as their Enemy'** because **30%** of the farmer's income goes to destroying the grass. To get rid of **'Grass'**, repeatedly farmers have to burn them, which harms the **'Environment'**. For the growth of crops farmers spend on fertilizers, but surprise is that, before the crop eats and grows, the wild grass eats, grows faster than the crop and suppresses the crop under itself!! Seeing this, the **MFS** experts says, this grass is the enemy of crops so uproot it. In life, look at the donkeys, how they eat grass, same way in MFS, farmers also become like donkeys and uproot the grass from the soil and then for crop growth use chemical fertilizers. **Today farmers and the new generation avoid farming, because a lot of hard work has to be done in MFS and in the end nothing is achieved.**

Till date neither the farmers nor the MFS advisors have been able to understand that despite being uprooted, burnt, acid being poured on it, being crushed by heavy tractors and buried in the soil, wild grass grow again and again and faster than the crop!! Why brother why!! Why farmer do not able to destroyed grass? And if you try more and more than a wild type of grass grows in the fields and its name is **'Congress Grass', which never gets destroyed and cannot be controlled by any system.**

The truth of life is, to live, everyone needs 'Healthy Food', but no one is ready to do MFS because of hard work, if simple, cost-free and effortless OFS is shown then everyone will like do farming and will like to become a 'Millionaire' by 'Doing Nothing'.

First it is important to understand why grass grows? Why does a farmer consider grass as the enemy? **To whom you consider as the enemy, do you think that 'God' is a fool so again and again he is giving birth to the Grass? To stop the loot of MFS and to get out of the illusion, it is necessary to have eyes with the vision, now looking at your field, tell me does such a situation arise in the fields?**

In **MFS**, before starting a new crop, the farmer destroys all the old crop remains and 11

after cleaning farm land, starts a new crop. For crop growth with seed, farmers use some fertilizer and then do irrigation. **Now see the most important thing. In 15 days first crop seeds germinate and grow up to at least 6 inches and if soil is fertile, then only grass grows but its length will not be more than 1 inch.** Till here the work of MFS goes on very well, after that the looting plan starts.

Now think, there was a gap of 5 inches between the crop and the grass, if both are eating the manure then till the full yield is obtained, there should be a gap of 5 inches between the crop and the grass, but this is not happening!! Why? In MFS, the grass grows faster than the crops and how does it bury the crops under itself? **Do you think that your crop has taken sleeping pills and has forgotten to move?** The truth is, in the competition, the crop was ahead of grass, so why does the crop not move ahead after eating the manure? The most important question is, did you sow the grass seeds along with the crop seeds? **The way you destroyed it, then from where does that grass come again and again and how does it grow faster than the crop?**

By saying grass as the enemy, **'This World Looting Plan of MFS goes on for many years'**. Because only after removing grass, for crop growth farmers have to purchase fertilizers. You have seen that, **'In the competition the crop was a head by a margin of 5 inches but where is the 'Natural Cycle' given free manure of earthworms, which crop can eat and grow?'** In the greed of getting more from MFS, in the first three crops you have sucked the milk and also blood of your 'Mother Earth' due to which, the land has become weak and 'Barren Land' so tell me where is the manure? The production you are getting today is based on 'Chemical Fertilizer' which you are purchasing and using for crops. **By such an MFS grown crop plan, first they give disease and then sell us 'Chemical Based Pill for Relief'. In short, they loot with both hands and now by this 'Bad Karma', this MFS developer is also suffering and dying with suffocation.**

Grass and vegetation grows only at those places where it gets three things, **'Sunlight, Moisture and Soil'**. Grass and many other trees - plants grow naturally on the roofs of the house, on cement walls and near the water pipes of the building, please tell, who is giving fertilizer to grow further? Actually, the grass growing in the farm is **'A Blessing from God'** and due to this the new crop gives abundant yield which is like **'Rain of Gold'** to the farmer.

Why does grass grow? After finding scientific reason, since 1960 the Shri Save family has been doing OFS and till date they never uproot or remove the grass and till harvesting, they consider grass as a friend of crop and both friends grow at a distance of 5 inches, because they do farming with free manure given by earthworms and this maintains the fertility of the soil.

Due to MFS, grains and fruits have become poisonous and tasteless. Due to poisonous food, people fall sick, suffer from many diseases and live their life by taking medicines, but how long can one live like that? To find the answer, **I am Ashok Vadilal Sanghavi, a farmer and a businessman, living in Mumbai, when I was 21 years old, I had a disease** 12

called 'Gout - Joint Pain', for which there is no cure till date. In search of a healthy life, how did our ancestors get 'Natural food'? When they fell sick, which medicine did they take? In Hindu - Jain scriptures, the message of 'Load Shri Rushabhdev' is written about 'Asi, Masi and Krushi' and farmers used to do farming with the same system, but to start MFS, the fraud people burnt all those scriptures. Still I decided to do OFS, but at that time I did not know the ABCD of farming. So in the year 1981, I went to meet Shri Save. I was amazed to see Save's scientific system of getting healthy produce, so I decided to do the same OFS, so I asked Shri Save, 'Sir, how much time will it take to learn OFS and how much will I have to pay to acquire that knowledge?' I had never heard such an answer in my lifetime as 'Shri Bhaskar Hiraji Save' gave me at that time.

Shri Save asked me, 'Have you studied farming?' and I said no. Then he said, 'Since 1960 I have given free information about my OFS. After receiving many awards, people from all over the world come to see my OFS. Till date I have not hidden anything about my OFS and have shown that I grow my crops with my developed local seeds. To do farming, without ploughing, fertilizers, pesticides, without weeding and I do not buy anything from the market, every year I get healthy production and till date only by little water irrigation from each tree I get 350 to 400 coconuts, also I get chikoo, mango and other rich products in horticulture and from field crop of four to six months like rice, wheat, vegetables and many other crops. Everything is visible in front of their eyes, but after studying, getting degrees, these 'Brainwash' holders understand only one thing, 'After production, the fertility of the soil decreases, so it is necessary to give chemical fertilizers to increase it !!??'

I have wasted a lot of my time and energy in convincing such degree holders, but Ashok Bhai, in your case you are a blank paper and whatever I write, you will read, understand and will do OFS so to teach you, one day is enough for me and you will be able to do farming and will earn. I will be proud to teach a Jain businessman like you and hence I will teach you for free, because through OFS, I want to make 'India the Best Farmer in the World and to make the Farmers Prosperous'.

In this World, 'FREE' means to trap someone in their own system, so I had a doubt that since 1960, people have seen Shri Save's OFS and it shows that profit can be made without any investment and effort!! Then till date, why have people not adopted? All that farm visitors were fools? Or Shri Save could not explain it properly. I am a businessman and we do only that business in which profit is visible. So, I thought like MFS, this OFS also must be an illusion and a plan to trap the peoples?

Shri Save did not know that for my farm development I have taken many reports from MFS degree holders, almost all the reports have shown an investment of Rs 60 lakh and profits of crores, but brother, this was only on paper. Also, many reasons were written about nature, such as, rain may be less or more, insects, birds and animals may attack the plants, due to which there is a possibility of loss. Now tell me brother, after getting information about the loss, will any businessman go for farming? But to live disease-free I was in need 13

of healthy food, so I took Shri Save to my 'Sanghavi Farm', to know investment, time to start getting crops and from farming how much profit I will get?

Experienced Shri Save saw my land and said, 'Ashok Bhai', the land sellers have cheated you and sold you 'Barren Land', look at this land, only stones are visible, not even a blade of grass grows on this land, there is no trace of soil here, so how can we do farming? *But don't worry brother, I have full faith in my OFS and if you want to write my words, then write on this stone that 'This land or in order to earn more by MFS, farmers who has made their good fertile land 'Barren', such land can become fertile again'*. Now you will have to spend Rs 50,000/- to make this 'Sanghavi Farm' fertile and by planting three types of plants, only by just little water irrigating, without any input cost, in just 4 months, you will get your investment back with profit and then life time you can earn good profit. To make your farm land fertile, I will give my 'Services Free', because as I said, I want to make our India a Farmer Best Country by OFS' and want to eliminate 'Hunger from the World'

Tell me brother, in report of MFS degree holders has shown an investment of Rs. 60/- lakhs and 'No Guaranty', where in Rs.50,000/-, 100% guarantee of success, Shri Save is ready to give in writing on the stone, will any Businessman and Farmers refuse to do OFS?

We covered the barren land of Sanghavi Farm with 2 inches of pond soil.

In the year 1987, on 24 acres of my 'Sanghavi Farm' of barren land, I took guidance from 'Shri Save Family' and just as Shri Save, My Master said, in just four months, I got nutritious food for healthy life, all scientific data of 'Shri Save OFS', the onetime input cost on the barren land, I got back with the profit. I am updating my website in the year 2025, so from the initial investment of Rs.50,000/-, till date of 38 years, I have not invested even '1/- Rupee' and only with water irrigation, without any new input cost. I am getting the highest production and profit. By the grace of Shri Save Family, I have also received many awards, you can see list in the 'Achievements'.

From Shri Save OFS, I got a very simple system of healthy living and the way to become a 'Millionaire', also got a lot of new information which is written in 'Hindu-Jain Religious Books'. I came to know why all the discoveries of Shri Save have been suppressed. If all the discoveries of OFS are made public, then 'The World can get 14

Rid of Hunger, Water and Global Warming. I thought, **dogs (traitors)** also live their lives but we are **'Humans'** and live for the society, so I also started promoting OFS like Shri Save family and asked people for support for the **'Noble Work, to Protect the World'**.

Just in 4 month development and production of 'Sanghavi Farm'.

In the World, no one can cheat 'The Farmers Society', that is why, I have registered Shri Saves discovery of Organic Farming System and gave all the OFS information, Free of Cost to the World People.

I came to know that even after seeing 'No Input Cost of Shri Save OFS, why did people not adopt? So, I thought like a business point view, if I explain about 'Profit and Loss Accounts' and show the 'OFS by PowerPoint', then people will adopt, so from that day selflessly, **with the Shri Save family,** I started promoting the Shri Save OFS, I also wrote a book in 4 languages and gave title 'The way to Healthy, Wealth and Happiness'.

For awareness and to show the right system, I started touring. 'First Shri Save says all about his experiences then by showing Shri Save OFS by PowerPoint' I used to say, In this world by investment any one can do MSF and after working like animals on the field, why do farmers not get benefits? **On one hand the society says the farmer is 'God', because the farmer only gives food for living and on the other hand, the same society is looting farmers!!** Many 'Greed Politician' misguide the farmer and in the name of 'Subsidy' ask farmers to beg help from the government and world richest farmers start begging. **Brother, in this world there is no magical, which can produce from 1 to 1000 new grains, which you do hard working and thinking that you are earning by MSF, if it was true then why do farmer commit suicide??!!** Look at our farm photo and see Shri Save OFS, if a businessman like me and only by irrigation, **if I am getting the highest yield and profit, saving livestock, protecting the environment, then from birth, why are farmers not earning? Who is looting farmers' hard earned money?'**

For farming you used to get free manure from 'Mother Cow', now in that place, MFS made a plan and showed a system of 4 times production. It is true that in the beginning and only for three years you got 4 times more production and you got trapped in MFS. Due to chemical fertilizers, **the need for 'Mother Cow' has ended and that is why everyone sold it to the butcher.** Now think brothers, when you are getting four times production and huge profits by using chemical fertilizers, then **why is the government giving taxes money as** 15

a subsidy? From 1960 till date, we have not taken any subsidy, yet we are getting the highest yield and profit from Shri Save's OFS. For many years to loot farmers, many such plans are on and below I have given all the reasons and proof.

To stop farmer suicides and to provide healthy food to everyone, as I have written books and provided all the information about Shri Save OFS, so that farmers can get at least 900% profit. I got relief from all my incurable diseases by eating OFS healthy products and by taking my developed 'Natural Salt 2 Tablets'. Now, how can one get relief in 15 days by taking 2 tablets and how to get relief by eating 'Healthy Food of OFS', on this website all that information is written in the 'Natural Tablet' section.

'Seeing is Believing', so every Saturday we 'Save & Sanghavi' welcome people from India and abroad to see **Shri Save OFS**, so that they can join us and together we can spread the hidden knowledge. The reason for this unity is, '**Shri Save has received many prestigious National and International Awards for his Scientific Research and Zero cost Organic Farming System**'. (NABARD Bank has published our information.) But to loot, **MFS** developers and traitors of the country have suppressed **Shri Save OFS** from spreading. Farmers are trapped by computer pictures and videos of **MFS, Green Houses, Hybrid seeds etc.** Farmers are still in illusion and thinking, one day they will get higher yield.

In the beginning I said that I am a businessman and we do only that business in which we see profit. Now see, why did I choose farming for my livelihood? So that I can become a 'Millionaire' and live a healthy life. Now see my calculations from a businessman's point of view and you will understand the reason and I am sure you will adopt 'Shri Save OFS' along with other work.

To develop a plant from a mung seed, take a plastic bag, fill it with some soil, sow the seed, then pour some water for its germination and put it in the sunlight. **Understand that a seed cost is Rs.1/- and soil, water and sunlight are available for free and by 'Natural Cycle' a seed get germinated, roots get develop, then branches, leaves and one complete plants get ready and in this process, we do 'Nothing except water irrigation'.** Now the plant, considering its duty and religious work, is preparing many new seeds in **90 days**. For our '**Good Deed**' of '**Cooperation**' with the '**Green World**' in return, we get many stems of mung, which we dry, break and use the same mung for our healthy life. **In fact, soil means 'Mother Earth' and just as we do not keep account of the milk fed by our 'Mother', similarly we should not keep account of the produce given by 'Mother Earth', this is what our 'Hindu Culture Teaches Us', but we all are immersed in foreign and 'Modern Culture' and keep account of every produce, so come on brother, let us also take account of the produce (milk) given by 'Mother Earth'.**

You have seen that against one seed investment of Rs.1/-, in just 90 day with the help of '**Nature Cycle**' and only with water irrigation farmers get '**1,000 New Production / Creation / Germinated New Seeds**' which means farmers get an earning of Rs.1,000/-. In factories we businessmen never do production but from farmers raw material we 16

do only conversion, in that work we calculate burning loss, overhead, less production and to put our selling price label, we consider only 10% of new production and we put our sell price label. Similarly, instead of a yield of 1,000 grains, we consider only 10 grains as received and consider the rest of the production is eaten by animals, birds, rats, country traitors and beggars, on this basis let's understand the further calculation.

In business, if we get a profit of Rs.1/- from an investment of Rs.1/-, then we consider it 100% profit, **brother such a huge income is not obtained even by risking and doing wrong things in the life**, where in OFS, as per business calculation a profit is Rs.9/- from an expenditure of Rs.1/- **which is considered as 900% profit**. This calculation is only of one grain after less production, now just think, if we count it like you are getting 1,000 grain and if we count the yield of your entire farm, **Perhaps even the calculator will not be able to calculate the profit!!**

Think brother, 'A Millionaire Farmer Like You', even after earning so much profit is begging for the subsidy!! My dear brother and 'Food Provider God', who is forcing you to beg? Even an illiterate can understand that, only by converting your given raw material into finished goods, we factory owners are buying cars and bungalows and suppose due to MFS, your production is stopped then how will the factory run? How will people live? I have travelled all over the world, if the farmers do OFS and in factories, we do only processing, then also both will get four times profit, because in the world, to stay healthy, there is a huge demand for OFS healthy produce, so food processors should pay attention on this and to earn more profit, they should set up a processing factory in the village. I had earned good profit in such food processing.

Since 1960, Late. Shri Save's family and myself, we both have shown concrete **'Hindu - Jainism Cultures and Shri Save OFS'** but the farmers have neither the vision nor the faith, that by **OFS** their farm yield will increase and will earn profits. The truth is that the farmers do not want to come out from the illusion of **MFS**. The most important thing is that Indian people believe a lot in fate, they do not want to try anything new and think that 'if it is in our fate, then one day we will get it!!' They just spend their lives in this blind faith by chanting rosaries and doing puja. **Everyone needs food, but no one wants to do the work of sowing seeds!!** Even after seeing this **'Do Nothing and Earn More - OFS'**, people are so lazy that they don't want to try to get **'Natural Free Food and Water by OFS'**. Many people want to live like beggars and wait for the free schemes of the government. Until such slave keeping schemes and subsidies are not stopped, 'No one will wake up from deep sleep'.

See some concrete proof, how we are ruining the lives of our children, so that the new generation can avoid becoming slaves and live their lives happily. Children are studying **'Modern Education'** in schools and colleges, **till date not a single college has earned a profit of even Rs.1/- from that education system!!** So due to such studies children are becoming **'Bookworms'**. See proof of this, after 10 years of MFS studies, a farmer's

son cannot do farming!! Doctors cannot cure their illness!! With such wrong education and paper degree certificates, the new generation can do only 'Jobs' (slavery).

In the name of MFS education, to get benefits, see how people's tax money gets used and new generation life gets ruined. Nehru - Congress made a plan and showed in the farmer society that, 'Dr. Swaminathan has discovered the 'Modern Farming System - MFS', by which we are succeeded in increasing four times farm production and now the country has become self-sufficient in the production of grains, Dr. is the Krishi Pandit and God of MFS and India has done the 'Green Revolution'. Saying this, 'Dr. was given many awards for the new discovery of MFS'. From that day, for the proven system, in schools, colleges, the new education of MFS started, large farm land and all the necessary inputs were given free, for practical study. Today all the colleges in India have at least 1,000 acres of land on which children get the proven system education of MFS.

For practical proven MFS study, children are made to work free in the fields so the child and the country can become self-sufficient in food grains and such knowledge of MFS is imparted till the child gets a degree. From proven MFS study ever think is given FREE, but from thousands of acres of college land, from independence till today, in India, no college has earned even a Rs.1/- as a profit!! Rather, by providing MFS education, the country has only suffered a huge loss, the time of the students has been wasted in the brainwashing and even today this scheme is on and still every year the Government of India is giving 75% free grant to all 'Agricultural Colleges!!' When Shri Save asked many questions to Dr. Swaminathan, he could not answer even one. A book is published on this debate which is a solid proof that the 'Green Revolution was fabricated' and Shri Save has exposed it.

When the college cannot earn then what can be the purpose of giving 75% grant? After giving degrees and brainwashing, farmers are growing poisonous products and that increases the cost of farming and such MFS policies make money very easily and that is why see the current situation of 'The World Best Farmer of India'. Another way of earning is, 'Give toxic food, which gives incurable diseases and later give pills in the name of 'Modern Treatment' so life time one has to take poisonous medicine.

Why did we say that by 'Modern Education' children are becoming 'Bookworms' and do only 'jobs (slavery)?' see proof, open any 'University' website, all have written 18

the same advertisement, **'After studying here, you will get a job (!!)** Why is the same thing written by all? Because companies want to run their industries and **they want to keep our children for their service - jobs (slavery)**. For writing such advertisements 'Universities and Colleges' get donations and good commission.

To reduce the production cost, **'Roberts'** have created, due to which thousands of people have lost their jobs. Due to the excessive production by **'Roberts'**, small **'Industries'** have closed and more are closing. **This is the reason, even after having a degree, one does not get a 'job'. Now think, how will one survive without food, water and money?**

Multinational companies know about **'Hunger and Water Crisis'**, they also know why **Shri Save** has got many **'National and International Awards?'** But to run their industries, they will never help people to become **'Educated and Self Dependent by Shri Save OFS'**. Fact is that many of them have their **'Charity Foundations'** and they want to **'Keep People Poor'**, because they know, lazy people will produce only children and when companies need them, they can put them on **'Job'**(slavery) and very easily get **'Body Parts'**.

Due to **MFS** poisonous food, all get diseases and many cannot give birth to a child, but with a **'Holy System'** this is possible and you one give birth to a **'Boy or Girl'** as per your choice, this information is written in the **'Natural Tablet'** section. The truth is that everyone wants to live their life happily and peacefully and everyone is worried that, **how will we live in old age? There is an easy way one can become parents, without anyone's mercy, by becoming self-reliant, one can live a happy life till the end.**

In your life you must have seen fruits and grains produced on **'Green Worlds - Trees and Plants'**. Sir, do these produce of **'Trees and Plants'** ever eaten by them self? **No!! 'For our Living, to give them for free is their 'Religion and Duty'**. So to stay healthy, accept this product as **'God's Prasad'** and become the protector of the earth. **So please do not interfere in 'Natural Cycle' and this is our 'Religion and Duty' and for this work only we have been given birth, so by doing this work 'Honestly', we should be ready to go empty handed at any time, because no one knows when 'God' will call us back.**

In reality, these trees and plants are our 'Children', to serve us, who stand quietly at one place, do not run away, do not become the son-in-law of someone's, do not even quarrel with us, give us their produce without asking, so that we can live our life happily by selling it and all this is given without asking. (Whereas, for own rights, what do our children do?) The truth is that the 'Green World' does not even ask for water, but quietly stands in the scorching sun to give free service as a truthful 'SON', so for their thirst, give only that much water so they do not get suffocation.

See one concrete proof, with less water 'Green Word' takes our 'Human Care'. By the 'Surya Mandal of Sanghvi Farm' on one acre, 19

12 X 12 coconut trees (144 Sons), each are surviving on 1 litre of water and if they want more they draw from the atmosphere. By this we have proved that without 'Job' (slavery) and only by water irrigation, a family of 8 people can live happily and earn a lot of money. Our request is, by MFS we kill many innocent 'Green World' friends, so to flourish and to give free food 'Green World' is helpless, so please do not use any toxic inputs.

In brief let's understand the entire Our 'Shri Save Organic Farming System'. To live we are getting free food from 'Trees and Plants' and they are standing at one place and can't move, so to keep them alive we must give dung in the form of food. To give dung to 'Green World' we have to save 'Our Livestock' and to keep them alive we need grass. Now for fodder of our animals we get it free from 'Natural Cycle System', because grass grows naturally along with the crops, so let them grow and to get them permanent, never pull them from soil and just like we do 'Haircut', in the same way, leaving some part of the grass in the ground, cut the above part of the ground and feed it to the animals, so that we get dung free of cost. Now from that dung, 'The Farmers Best Friends Earthworms' make healthy food and through the roots it goes to the mouth of trees and plants. We should feed some part of the grain that we get free from trees and plants to our 'Crop Protector Friends - Birds' and they also provide manure to the trees and plants. Sir, this is called 'Natural Cycle' and we 'Humans' get everything free to live and to protect 'Natural Cycle and this Beautiful Earth' we have got this 'Precious Human Birth'. That is why it is written in 'All Religions and Hindu Scriptures' that, 'Live and Let Live, Do Nothing and Earn a Lot'. Other creatures never interfere in the 'Natural Cycle', that is why they are all living happily and we all know that we have to go empty handed, even then see, what are we doing? The 'God' who has made us 100% Pure Vegetarian, but for which taste, 'Human' has become a sinner and kills thousands of innocent crop protectors and by making his stomach a graveyard eats 'Non Vegetarian as a food!!' Now you tell me brother, how will we get 'Food and Water' free Service by 'Natural Cycle' and how will we become a 'Millionaire' by 'Doing Nothing?'

I want to ask the 'Respected and Honourable Principals, Professors, Teachers'. The fact is you are the real 'Gods and Goddesses' of the new generation because by giving modern education **you only develop children's future.** Please say by swearing and putting your hand on your heart, just to get a salary and to protect your job, are you not wasting your and children's precious time by teaching all the modern methods? You know very well that today's modern education is of no use in life and you have also read the solid evidence of MFS and OFS. **New generation developer and children's God, the country is getting ruined in every way, then why are you doing bad deeds by giving wrong education and why are you making children a 'Bookworms?'** Guru even dogs live their life and fill their stomachs, but sir we have got human life due to good deeds which should **20**

be used for the prosperity of home, family, society and country. Think, out of thousands of people, why **God** has given you this opportunity to do the '**Holy Work of Teaching? Shri Save, as a God he came in my life and showed me the right system and honestly to become a Millionaire**'. I request that for the bright future of the children, please visit our farm, show our actual work system and give the right education about how they can get rid of '**Global Warming**'. If this is not possible then we can show our system by '**PowerPoint**', how to protect **Nature, Environment** and how all can get rid of diseases with '**Natural Tablet**'.

Today the world needs a Guru like Shri Save, who lived for others. To save the world, without any greed and reward he has disclosed all his research with the proof, shown 'The way to get Healthy Life, Happiness and Prosperity to the Society'. So, to get the world out of MFS, we are running 3 days OFS teaching classes at Kalpvriksh Farm. Shri Modi ji also said to adopt OFS, so in India - Gujarat, starting the world's first 'Organic Farming College' and for study, an agreement has been signed with the Shri Save family. But you know, who is stopping India's progress and 'Great Noble Work?'

Shri Save Guru Mantra of OFS is, do not buy anything from the market which are sold in the name of giving more production and most importantly is, the farmer should send only the healthy produce from his farm and from that produce, the farmer should take out the seeds of the next three crops. (Even from the hybrid seed produce, by taking the big size seeds, sowing the same three times and taking new crops, we have prepared our own local seeds.) Apart from the crop, the farmer should not even let out an inch of grass from the farm, because that green waste gives enough produce to buy '**Gold and Silver**'. **Instead of asking for subsidy from the government, request to bring the green organic waste of the city to the village and bring it to your farm, which will be converted into good and free organic manure by, 'The Best Friends of the Farmers - Earthworms**'. This way, the tax money received by the government will be saved, subsidies will stop and the problem of disposal of city waste will also be solved.

One day I asked **Shri Save**, you have been doing OFS since 1960, you have received many awards for your scientific proven system, till now many people have visited farms, stolen your research and then they cheated the government, looted farmers and claimed that this is their discovery and also received awards. **Guru Ji, you have all the proof against them, but till date you are silent and have not exposed them. Even today you are exposing your OFS without any selfishness!! Guru Ji, what do you get by showing this honesty?**

To bring peace and happiness in life, **My Guru Shri Save** taught me the best lesson and gave '**Guru Mantras**'. **Shri Save** said, '**Lord Krishna has written in the holy book 'Do good deeds and do not wait for its Results', because no one get results before time and more than fate**'. The money you earn, whether right or wrong, we cannot take with us in 21

our last journey and no one can buy happiness with it, but when you serve someone selflessly without any expectations and rewards, only then we get happiness in life and this is a right way to get salvation. The most important thing is that your good work and honesty never remains hidden, so till date I have never asked for any reward and see, why **'God'** sent a **'Jain Businessman'** like you in my life? Why are you helping me selflessly and see our both results, a small farmer like me got many prestigious **'National and International Awards'** and in all your **'Incurable Diseases'** got relief. When someone robs innocent people, loots hard earned money, snatches someone's right, then a curse comes out from that person's heart and whoever does such injustice, he gets the punishment for it and in any way that person has to suffer punishment and this is what is written in all the scriptures. **Keep one thing in mind, do your 'Good Deed' with a true mind and heart and do not consider a person as a cheater or honest, show the whole truth, whether he accepts it or not, it is his wish. In this case, who is honest and who is a cheater, do not go deep and do your work Mr Sanghavi.**

All religions say **'Live and Let Live'**. We have got this **'Human Birth'** for our good **'Deeds'**. We did not get this birth to work like an animals, to earn money, sacrifice life in war and to protect religion, to take away someone's wealth, country's property and land. Also not to consume poisonous medicines and live a suffocating life, but against past good **'Karma-Deeds'**, we have got this human life. For enjoyment and to give happiness, **'God'** is running his **'Natural Cycle'** and gives all free of cost. But **MFS** has created all the **'The Environment, Global Warming, Hunger and Water Problems'** and still many crazy people want to rule the whole world and by war, the land is being further destroyed by **'Chemicals and Nuclear Bombs'**, which are increasing more and more problems. In such a bad situation only **'India can Bring World Peace'**. Because our ancestors knew that as per the karma of doing **'Violence'** (Hinsa) one gets **'Sorrow'** (Dukha) in their life and this thing should be remembered by everyone therefore for ancestors took the violence (**Hinsa**) and sorrow (**Dukha**) word and established the **'Hin du Society'**. **So even today we believe in peace and hence India is progressing together with all religions. But for our 'Good Nature' some people is miss understanding us, they do not know now Shri Modi is there in India.**

The British could not loot India even after ruling for 200 years, then they found the reason for India's prosperity and then prepared MFS and Hybrid Seeds. The growth length of the new seed plant was less than the 'Natural Grass' so the crops did not get sunlight, so at that time scientists started saying wrong things and the farmers believed that 'Grass is the Enemy of the Crop' and just started uprooting the grass from that day. 'Sir, this plan was for stopping free grass for cows, so automatically free dung got stopped, by which farmer was doing farming. By this big plan they started selling their chemical fertilizer. The plants grown by hybrid are

very hard like stone, so the animals cannot eat them, so the farmers started buying 'Animal Fodder' and after some days the farmers started feeling the burden of keeping a cow at home, being 'Hindus' and knowing that 'Cow is Mother and Cattle - Livestock, people started giving their cattle to the butcher'. This way, the plan to loot the agricultural country started from that day and is still on. Similarly, MFS gradually started creating havoc all over the world, people started falling ill due to poisonous products and in the name of treatment they started selling 'Modern Medicines', due to which all are living a suffocating life and due to its 'Side-Effects', there is cancer in every house. 'This secret of looting destroying prosperity of India by the British was discovered by Shri Save'.

Thousands of cattle have been slaughtered, many more are in line to be slaughtered, this raises the question, how will farming be done in future and where will we get free manure? In this **OFS** connection, we are using the '**Gobar -Dung Gas System**'. **After getting cooking gas, we are using the remaining waste – slurry as manure, whereas in the old OFS, the ancestors used to go to the farm fields and excrete faeces-urine, which Shri Save used to refer to as 'Gold-Diamond' yielding manure.**

Due to **MFS** Agricultural production has increased 4 times, '**Robot New System**' has increased 4 times production which has reduced production cost. Now let's see, are you really a '**Highly Educated, Intelligent and Degree Holder**', or you are '**Stupid, Dim-witted or Bookworm Person**'. Please tell me, **'After four times more production in agriculture and in industries of more production at a lower cost, should the cost of all living expenses increase or decrease?'** If you are really educated, then people like you should live happily in '**Joint Families**', just for money should not run away to foreign countries to do '**Job – Slavery of Whites**' and fact is should take care of parents and live life by taking guidance under them, but by making you a '**Bookworm Brother**' and now everything is going the opposite!! In the name of modern science, you go to the '**Moon and Mars**' and on other side send your parents to '**Old Age Homes**', send your children to '**Boarding Schools**', repeatedly interfere in every work of '**Nature Cycle**' and earn money through all kinds of wrong means. Actually, you are degree holders in agriculture, but you people do not use your intelligence, rather you ruin yourself by listening to others and turn your fertile soil into '**Moon Land!!**' By doing wrong education through **MFS**, people want to snatch all the departments of '**God**' and even after so much destruction, they still want to do many new experiments and see what condition they have made of the world by doing this!! **If this continues, then in future there may be a 'World War' for getting 'Food and Water', if we have to stop this, then we have to make a plan to live a new life together and how can we stop this?**

say 'Michhami Dukkadam' - which means, 'If we have done any mistake knowingly or unknowingly or have hurt someone by our greed work, then I am asking forgiveness for all my mistakes'. Similarly, if someone has hurt me, then I also forgive him from the bottom of my heart and mind'. By asking forgiveness with this pure feeling, the merciful 'God also forgives all our mistakes'. This does not mean that we make mistakes again and again and ask forgiveness from our 'Dear Kind God'.

In fact, after making many mistakes, to get rid of all the troubles of life, we all search for the merciful **God in Temples, Mosques and Churches**. Every day in our prayers and to fulfil our greed we say, 'O Lord, look I am giving you coconut and flowers and promising that if you do my work, then I will put some profit in your box or will also do some donation, just get my work done'. In this way, to become a 'Millionaire' we ask help and kind blessings like a beggar!! The truth is that all this happiness, money and life is given by Him and we try to bribe Him with the same money. Understand that even if we get money through begging or wrong means, we will have to leave all in our last journey so it is better that we help the 'Natural Cycle'. Brother, there is no need to do all this bribe, because to make everyone 'Millionaire' our 'Bhagavan – God' wants to give us with his both the hands and he is giving to all and that 'God' is in front of all our eyes, we see him all the time but we do not have that 'Vision' to know him, because after adopting MFS our stomachs does not get fill, so we do not recognize that GOD and we do not become rich.

We 'Save and Sanghavi' will introduce to that 'Kind God' who is giving all the life living free. Everyone makes mistakes in life, but the day from bottom of hart when we apologized for our mistakes from 'Helpful God', on the spot our whole life has changed.

While doing MFS for 10 years, in 1960, **Shri Save** came to know that by doing MFS, I am repeatedly interfering in the 'Nature Cycle'. The truth is that from sowing seeds to getting the production, everything is done by nature and I do only irrigation, but I am using MFS fertilizers, driving heavy tractors on 'Motherland', repeatedly uprooting grass and 'Stripping the Clothes of the Motherland', I am spoiling my fertile land, by uprooting grass the sunlight falling on the earth which is increasing atmosphere temperature and MFS has made holes in the 'Ozone layer of the Sky'. This system has 'Disturbed the Environment', which affects the rain and it is decreasing at some places and increasing at others. **Shri Save** realized that in the greed of getting more all this is happening because of my adopting of MFS, I am spoiling the 'Earth, Sky, Air, Water and it increasing the Heat'. In short, on one hand we worship 'Tree & Tulsi Plant' in the courtyard of our house, because the scriptures say that 'Lord Krishna' resides in the tree and plant, I am also worship it and on the other hand I am interfering in work of 'God by MFS', on top of that I am asking for help by lighting lamp, incense sticks, candles!! Due to the punishment of my 'Bad Karma', 'God' has taken away the hearing power of one of my ears and I am also a culprit of this 'Global Warming'.

Shri Save remembered his childhood days that he used to live in a joint family, used to do farming according to the rules of Hindu scriptures, earning good and 24

used to live a happy life. As soon as he remembered his old memories, he thought of doing something new in farming. Shri Save saw that according to the 'Natural Rules' animals and birds are living their lives very happily, but in the greed of getting more by MFS, I am living life full of diseases by interfering in the 'Natural Cycle', what God is happily giving free, I am losing even that. Shri Save realized his mistake and in 1960, on the same night, he was earning profits of lakhs by selling MFS's chemical fertilizers and was living a sinful life, so to correct his life mistake, he left that agency and started experimenting with OFS which does not interfere with the 'Natural Cycle'.

Till now you know all the scientific research of Shri Save's OFS, now see that 'Bhagavan - God' who is giving us free food and water, since we do not recognize him that is why we misbehave with him. First know him and the meaning of that word 'God'.

To protect 'Cow Mother - Gau Mata' and 'Natural Cycle', our ancestors' scholars have written the scriptures of 'Hindu Culture' and they knew that we call 'Bhagwan – Ishwar –Prabhu –Khuda -God' in any name a people are afraid in this name of doing anything wrong and under this name for any work gives full cooperate and support. So the word 'Bhagwan' was created to keep society in fear and not interference in the 'Natural Cycle'. For peace of mind, an easy prayer was prepared, so to start new farming, all farmers read this prayer.

Before starting a new crop, people used to worship the plough and Mother Earth and pray, 'Oh Bhagavan - God', just as a mother feeds her children milk like nectar from her breast to sustain their life, and while drinking the milk, the child sometimes bites the mother's breast, yet the mother feeds them with love, similarly, 'Mother Earth', to sow grains in this earth I am ploughing this land with a plough, it may cause you some trouble mother, please bear a little pain and grow many new grains like a nectar milk, to sustain your children and my family.

This was India's culture and farming system to help 'Natural Cycle' and this information is known to all, but today in greed to get more, farmers have adopted MFS and interferes in every work, therefore they have lost even what they used to get for free.

The scholars of our ancestors knew the nature of human beings and to explain all the scientifically system it was very difficult, so to make the common man understand, to keeping them afraid so they do not harm and to protect 'Divine Power of Natural Cycle' scholars of that time took 'Bh' from Bhumi - means earth - land, 'A' from Agni - means Fire, 'Ga' from Gagan - means Sky, 'Wa' from Wayu - means Air - Gases and 'N' from Nir / Pani - means Water and created a new word 'Bh a ga wa n - Bhagwan it means GOD'.

The word **Bhagwan** means **Prabhu-Ishwar -Khuda -GOD**, who operate this 'Beautiful World', these three **GOD** whom we address as 'Brahma, Vishnu and Shankar'. Lord **Brahma** creates - (Generator– **G**), Lord **Vishnu** makes life live - (Operator – **O**), Lord **Shankar** destroys - gives death and then does the process of rebirth – (Destroy **D**). So, by combining these words, the purpose was to give information so that there should be no

interference in the '**Natural Cycle of GOD Creation**' and no harm to the '**Environment**'.

As soon as Shri Save became aware of the interference of 'Natural Cycle', he stopped all the farming work. Only after primary ploughing, sowing of seeds, he left all other work to nature and Shri Save's fortune opened up. In return for 'Good and Noble Work', 'Bhagwan - God' gave him abundant healthy production and huge profits which cannot be found in any other field. Today the coconut tree with lot of input cost and hardworking, annually each tree was giving only 30 to 60 Coconut, today the same tree only by water irrigation, annually each tree is giving a yield of 300 to 350 Coconut, which is 'Highest in the World' so in the 'Limca Book' it got recorded, we tried but the 'Guinness Book' does not want to record it!! Why? Because this is belongs to MFS Company.

Today people are educated by **MFS** and for everything they want '**Scientific Proof**', still we don't understand how people believe only in printed material, photos, videos and get trapped!! We say 'Brother first see, believe and then adopt.' **We believe 'Human Service is a God Survives'**, so to create faith in people, every '**Saturday**' we invite people to visit our farm so that they can show the work of our **Shri Save OFS** with concrete proof. **As per the wish of late Shri Save Guru, we 'Save & Sanghavi' put all the information of our 'Shri Save OFS' at the feet of society, so that our families get blessings to get salvation, we can do World Peace, Hunger and Water Problem get solution and we get success in making 'The World Free from Global Warming by Shri Save's OFS'.**

The fact is that everyone wants to get rid of '**All the Modern Systems**', but they do not have any '**Solid System**', so they are living a suffocating life. If we all work in unity and forget our differences, then together we can take all the countries of the world out of the '**Modern Farming and Modern Medical System**'. We are ready to help everyone without any '**Greed, Temptation, Reward and Award**' and can make everyone '**Self-Reliant**' by showing the suppressed '**Organic Farming System which Shri Save has Discovered**', by this we can '**Save the New Generation from Slavery**', so that everyone can '**Live their Life Happily in a Joint Family**'. We will reveal '**Shri Save's complete Organic Farming System and all the Secrets of the Natural Cycle**' through '**Power Point**' so that everyone can get '**A way to Healthy Life, Happiness and Prosperity**'. Along with making everyone a '**Millionaire**', we have given information '**How to get Relief from Any Diseases in 15 days**', see '**Natural Salt 2 Tablets**' part and by eating '**Healthy Food of Organic Farm**' get better healthy.

We 'Save & Sanghavi', our humbly request is, before it is too late, 'Wake up Brother Wake Up', we should 'Return Back to Nature and put our Head in the Lap of Nature Cycle System'. Our Shri Save used to say repeatedly, 'I do not oppose the 'Modern System' and it is very useful in living life, but remember that only when you work by combining 'Spiritual Knowledge Science and Modern Science, then only we can do progress in the life, only Modern Science will destroy this Beautiful Earth which is

happening in front of our eyes'.

**Do only Irrigation and 'DO NOTHING',
Crop Protection by Nature.**

Grass is a Nature Blessing for Livestock.

Livestock Provides Milk, Manure and Crop Protection Medicine.

Since 1960, Shri Save and since 1981, I, Ashok Sanghvi, have tried to make everyone in the world self-reliant, but we are helpless in the face of greed, loot, and the desire to earn more money. The government, journalists and society did not support us in publicity. Now if we want to save ourselves, we will have to awaken ourselves. Brother, I am now 77 years old and this is my last attempt to bring awareness about OFS in 2025. But Shri Naresh, Suresh and Abhijay of the late Shri Save family are doing my Guruji's work of human service and are giving free information on their Kalpvriksh and teaching OFS to 20 people by keeping them at home. I, Ashok Sanghvi, pray to God to give everyone a healthy life and happiness.
